BRAND BOOK

NARA

Revenue-driven personal branding. Activate the trust a founder already has. Prove what creates conversations and revenue. Build the brand from that evidence.

PROOF SHARPENS THE BRAND.

NARA Studio works with founders whose public presence is weaker than the work. The method starts with the people already closest to a decision: customers, followers, referrals, prior buyers, and the names that should hear from them first.

Map that market. Activate the warmest relationships. Track what moves. Then turn the evidence into positioning, content, and the next campaign. The brand has a commercial job.

THE MARK IS THE WORD.

N A R A

Set NARA in Clash Display Semibold, uppercase, with open letter-spacing.
There is no symbol. Use it in off-white on near black, or in near black on off-white.
Leave clear space around it at least the width of the N.

Do not redraw it, outline it, put it in a box, or set it in another typeface. Studio sits in the sentence around the name, not inside the mark.

CLASH DISPLAY

Semibold. Headlines, the wordmark, and large figures.

135 PROOF

76 MARKET

40 METHOD

On the site, headlines use this face at a tight line height, in uppercase. One word in a headline may turn signal red. That is the only colour change inside a line.

ARCHIVO

Text, navigation, captions, and buttons.

48 Join the work

32 *Every conversation is evidence.*

24 Different markets create different next steps.

20 *Start with the people already closest.*

Archivo carries everything that is read, clicked, or filled in. Regular for body. Medium for a subhead. Italic for a short aside. Buttons are medium, uppercase, and tracked.

THREE COLOURS. ONE JOB EACH.

#050505

Near black. Argument, night sections, type on paper.

#F5F5F5

Off-white. Method, work, and type on black.

#CF1C18

Signal red. The next action, and one word.

Red is not a background for a section and not a second headline colour across a page. If the eye can find the button without hunting, the red is doing its job.

NAME THE COMMERCIAL FACT.

Write	Short sentences. Say who should hear from the founder first, what was proved, and what happens next.
Prefer	Before you buy more reach, activate the trust you already have.
Avoid	Luxury adjectives, vague transformation, and language that makes the brand sound like a mood.
Proof	Use a number only when the record supports it. Say approximate when the figure is approximate.
The founder	NARA can build the system and run the activation. The founder still brings the judgement, the stories, and the sales conversation.

HOW A PAGE IS BUILT.

EYEBROW

The Warm Market Activation Method

HEADLINE

START WITH THE MARKET.

BODY

NARA maps the immediate market, activates trust, proves response, and builds the founder brand from that evidence.

ACTION

[GET THE VALUATION] [SEE THE METHOD]

Buttons are flat rectangles with no radius. The label is uppercase Archivo inside square brackets. The primary button is signal red. A second action is a hairline rectangle, not a second red.

BLACK FOR THE ARGUMENT. PAPER FOR THE WORK.

Open a page on near black when the founder is making a claim. Move to off-white when the page is explaining the method, the services, or a case. Keep photography full-bleed and grayscale when it is a portrait. Let the type sit on it, not in a chrome frame.

The wordmark stays NARA. The red stays on the next action. If a layout needs a third typeface or a fourth colour, it is no longer this brand.
